

PatientCare 360[®]

Access Purpose

After searching for and selecting a desired patient, you will need to select an appropriate access purpose for why you are accessing the patient's details. The following are the different options and when it is appropriate to chose each purpose.

Treatment

Viewing a patient for treatment needs

Payment

Viewing a patient for billing and payment purposes

Administration

Operational, compliance, and/or coordination purposes

Public Health

Disease surveillance, reporting, and/or outbreak investigation

System Administration

Contexture use for system operations and maintenance

Patient data access purpose: **X**

- Treatment
- Payment
- Administration
- Public Health
- System Administration
